**OCT 08 2004**

From: Randy D. Akins

Application number: 10/600,418

Publication number: US 2004-0069117 A1

The Sequential Image Advancing System (S.I.A.S.)

In May of 2004, I sent a request to the Commissioner of Patents to:  
"Invoke an Interference" regarding my invention. I have not heard from the  
Patent Office regarding this request.

I am again asking that the Examiner to "Make Special" and examine my  
published application comparing it to Mr. Hamilton's device listed below \*.  
The resemblance of Mr. Hamilton's device (in function and appearance) is  
almost identical to my invention. My proof of ownership can be  
successfully traced to the year 2000.

\*Mr. Hamilton's application number is: 09/917,992

Mr. Hamilton's organization is currently selling this device.

I see this as an urgent matter since I believe there is infringement on my  
invention.

My application claimed benefit of 60/390,749 on 21 June, 2002 (provisional  
patent) and was followed by the non-provisional patent application one year  
later 21 June 2003. That application is still pending examination.

Please respond and advise. My phone number is: 520-888-3739

Sincerely,

Randy D. Akins
